

THE LIGHTEST STICK IN THE WORLD!

183g!

As the pioneer brand in floorball Unihoc has always been aiming to bring the development of the sport, as well as the equipment, to new levels. The partnership with TeXTreme® is a major step in the constant search for bringing the most innovative products into the sport. It is a great privilege for Unihoc to collaborate with such a renowned supplier that matches the high demands for carbon fibre materials that are required to take the development of low weight sticks to a new ground-breaking level. We are very proud that we can now present an innovative range of sticks that are extremely light, but still offer the very best performance qualities on the market.

TeXTreme® Spread Tow reinforcements is the ultimate choice for making ultra light composites. TeXTreme® Technology is flexible and tow-size independent which enables development of optimized reinforcement solutions tailor-made for specific application needs. Utilization of TeXTreme® Spread Tow carbon fabrics and carbon UD tapes by manufacturers of advanced aerospace, industrial and sports products confirms that 20-30% lighter composite parts can be produced with improved mechanical properties and superior surface smoothness.

RELEASE THIS SUMMER. 8 STICKS, 2 FLEXES, 2 SERIES.
