BALLS	55

The game never stops.

What is floorball actually? Is it something you do according to a fixed weekly schedule on a pre-booked court at a sports centre? Or is it all the fun you can have with a stick and a ball, outside the garage, in the corridor, on the lawn or in a sports centre? We tend to lean toward the latter description.

Everyone at Zone has a solid background in floorball. Many of us have played on the Swedish national team and even had professional international careers. What compelled us at one time to start was how incredibly fun it is to mess around with a ball. We were either a few buddies just playing around in the neighbourhood, or we had no one to play with and just did tricks and shot goals until we were dragged in to dinner by a worn-out-from-nagging parent.

That's where it started - the love for the game. Those of us who work here are very protective of this feeling. It makes no difference if you play for the national team, an amateur league or if you've just learned to tie your own shoes. The way we see it, fun comes first. For us, floorball isn't something you play 3 times 20 minutes. And it definitely isn't why we try to make the world's best floorball equipment.

We're here for all the people who can't but love this innocently fun game with a stick and ball called floorball. We take you all very seriously.

Pipeline

A tribute to the individualists of the world. Pipeline is the season's big news. The new stick is our way of paying tribute to all who dare to go their own way. To everyone who improvises, breaks with tradition and reacts to sudden whims. To everyone with a more laid-back attitude to game plans and tactical schemes. To everyone who knows that artistry is where it's at. Floorball isn't an industry. Floorball is fun. Period.

The stick's design is inspired by the relaxed lifestyle of surfing and the Caribbean. Taking things one day at a time, watching to see which opportunities arise – that's the concept behind Pipeline. Pipeline is a stick for unexpected tricks, air hooking (zorro) and awe-some improvis. That's why we've curved the tip of the blade just a bit more. As a constant reminder to never forget the artistry of the game, we've marked the pocket with a Z. Look at it now and again. And remember the very essence of floorball. The shaft has a smooth leather VS-grip that ensures superb stick handling, even after your hands start to sweat.

GREED

Greed is good. But just for you. The first step toward becoming great is admitting that you want to win. Whether a one-on-one, a rush or an unexpected pass that leaves defence standing with their mouths hanging. Being greedy is just another word for the will to win every situation.

This is going to sound like a contradiction, but the idea behind our Greed sticks is that they should be versatile and yet uncompromising. Which is why we haven't skimped on the details.

The material and finish are the most exclusive money and great contacts can buy. Look for instance at the detailed, hand-sewn leather grips on Greed Curve 1.5° and 3.0°.

Then there's the blade. Engineered around the same platform as Envy Maxx, only here in a quicker blade that's 10 mm shorter, 4 grams lighter and with a slightly deeper bowl-shaped top.

The shaft is high-tech through and through. Curve, AHT or Carbon Ultra Light. Which one is best is a question of style, mood and your winner mentality.

ENVY

AERO HOLE TECHNOLOGY

Buy it. And put it behind lock and key. We designed the Envy series for one reason and one reason only. To at any cost make a stick that is better than any other on the market. The result is a stick that's more expensive than any other, but for good reason. Envy is jam-packed with innovation, in both material and design. Take the holes in the shaft for instance. The five ellipse-shaped holes serve two functions. Number one, they reduce air resistance for a faster swing. A fancier name for this is aero hole technology. Number two, they make the stick torsion stiffer and more balanced, giving you greater shooting and passing precision. And the shaft is baked in carbon fibre which helps to keep the weight extremely low. One look at the blade and you'll see that it is over-dimensioned. Not only did we make the stick's sweet spot bigger, giving you more options and a larger surface for a clean shot. We've also kept the lines straighter to give you better ball control in dribbling situations and better precision in your game.

If you view the court as a stage. And vice versa. 369 is our old faithful. A really popular stick series that first saw the light of day in 2006. And that's just had a top-to-toe makeover. This is a stick that brings all the artists out from the shadows. The blade is a genuine Zorro blade, with a deep pocket that goes from the heel all the way to the extremely curved tip. So if you're into surprises, this won't disappoint. The blade gives you magnificent ball control plus faster, sharper shots. The grip is smooth with a vertical seam so you never have to look at the stick to know which direction the blade is pointed.

How much are you willing to sacrifice? This is not something for chickens. The Rock series is made for players willing to go all the way. Who'd rather break a leg than pass on a one-on-one. Who don't care about technical mumbojumbo, but want a stick that lasts and that they can trust.

The blade is an uncommonly solid shooting blade. When we unveiled the series, a lot of shooters instantly took it to heart. They particularly appreciated the generous curve at the blade's mid and back sections. The tip is relatively level, guaranteeing better precision when passing. The grip is clean and the vertical seam on the back ensures your fingers are in the right position. The shaft comes in composite or carbon, depending on what feel you're looking for.

Here's one of our most versatile sticks. How we dare say so? Well, the blade is rather like the Rock blade, except for the deep curve at the tip, making it easier to keep hold of the ball. The shaft is available in both composite and carbon, making it the perfect stick series for many different types of players.

OX is a classic. The blade is rather straight with a slight pocket, so the precision in a passing play is like a dream. It also has extreme torsion stiffness, rewarding the player with extra pressure behind every shot.

People who think offensive. The stick is a tribute to the mask-clad wrestlers who devote themselves to Lucha Libre, or Mexican free wrestling. They're known for their tenacity, even when everything is pitch-dark and hopeless. Their attitude is to strive to win every time and persevere for an unexpected turn of events. This is an attitude that applies well to floorball. So we designed this stick.

Engineered around the same platform as Greed and ENVY Maxx, the blade is just a little shorter and crafted for younger players.

When we set out to make a series of children's sticks, we didn't want to do what everyone else did - shorten an adult stick shaft and smack a cartoon figure on it. No way. We started from scratch. We engineered a brandnew stick that took into account children's height, balance, muscle strength and coordination. The result, a superb floorball stick that matches the size and capabilities of children.

The Piraya series' shaft is available in lengths starting at 55 cm. And the blade is big enough to provide a generous contact surface and ball control but not so big that it becomes unmanageable. Balance between shaft and blade is the key. Piraya has it. The perfect stick for anyone who wants to kick-start a floorball career while boasting their baby teeth.

Modern backpack in heavy polyester with several internal and external pockets, equipped with a carabiner keychain. Colours: Black/red. Art. No: 33060.

GOALIE

For those who don't shy away from a little attention.

"The final outpost", "game hero" or "half the team" – there are numerous clichés about what a goalkeeper is and what he means to the team. But it all points to one thing – the goalie is alone and an extremely important, always exposed, team building element. Sky-high demands, you could say. You need the lungs, thighs and reactions of a tiger. An ability to cope with floorball's extremely high pace and instant play changes. Plus an ability to think tactically. To not just stop balls, but also be fast enough to turn the play with a well-placed throw. That's what it takes to be a good goalie.

Here at Zone, we work hard to design protective gear and clothes that help a goalie rise to greatness. That provide protection. That are lightweight. And that release body heat so the goalie can concentrate on the ball, the whole game through. And of course, it doesn't hurt if the equipment looks cooler than your opponent's ...

Icon 2.1 Silver/red

Our brand new top-of-the-line goalie mask with revolutionary design and an eye-catching look. The exclusive ICON 2.1 is a light-weight mask that has been equipped with a special designed Canada cage in steel, the inspiration coming from baseball catcher helmets, and developed to optimize the vision for the goalie. The mask has an adjustable chin cup and removable padding with a comfortable sweat absorbing fabric surface. The back plate is in ABS-plastic, with a brand new type of straps and rubber puller. Approved by IFF. Art. No: 32987.
